Where?

Further continuance of the Davin Canal Construction Division, under y
Chief Engineer's no. 6227/E & R 9.4.1945

The establishment attached to the Davin canal Construction Div is shown in the proposition statement (Slip A) and the period of sanction to the Div expires on 30.6.1945. It is now reported that the Elunisia, Hebbanavadi, Vidaghatta and Tungamma Branches are expected to be completed by 30.6.45. Div attending to the maintenance of the several channels and large extent of irrigation, the Supdg Engineer recommends the continuance of the D. C. Constn Div on a permanent basis from 1.7.45 with the establishment shown in the Statement (Slip A). Also for attending to extension of Elunisia Branch, anti malaria engineering works, Inter Village roads he recommends the continuance of the Gumanahalli Sub Div during 45-4 with the P.W., Medical, Police and Edn establishments, as existing at present. The Chief Engineer agrees with the Supdg Engr's recommendation and requests sanction to the continuance of the Div with the existing establishment du

1945-46, pending orders on the proposals of making the permanent Gos maintenance works.

2. The proposals require financial concurrence and may constitute a Council matter.

17.4.45 3. The Proposition Statement is not very clear as to the establishments reqd for the division and the Subdivisions. The CE I may be requested to furnish a fresh statement showing the existing Ests and the proposed permanent Ests for the Division Office and the Subdivl Offices at Kandy and Talagaravadi as also the existing est for Ilgamuwahalawa Subdn with any proposals for possible reduction.

G 17/4/45 4. Also to explain why a Constn Divn whose works are only temp[y] until constn is finished is proposed to be changed made a permanent Divn.

"b" to Put up letter of C.E. dated 4th April 1943

Kw/11 7/45

11. The C.E.I. proposes that the Irwin Canal Constn Dn temporarily sanctd may be continued on a permanent basis with two sub-divns with head quarters at Mandya & Talagwadi, the remaining sub-divn at Gamanahalli being continued temporarily during 45-46 for the execution of the balance works. The Dn is to look after the maintenance works in the area and has enough work for two sub-divns under it, as detailed out in the S.E's letter (flag Y). Considering the points put forth, the continuance of the Irwin Canal Constn Divn as a permanent Divn with two sub-divns may be sanctd and the continuance of the Gamanahalli Sub-div during 45-46 may be sanctd as per proposals stated above. The Comptr may also be authorised to pass the establishment bills until sanctn, if to the proposals is accorded.

12. The proposals are that the Irwin Canal Construction Divison may be continued on a permanent basis with two Sub Divisions at Mandya and Talagawadi,

P.T.O.

Continuance of the Irwin Canal Dn. Mandya.

No. 275

the remaining sub division at Gamanahalli being continued temporarily.

13. The details of work necessitating the formation of a Divison at Mandya for maintenance work of the Irwin Canal have not been given by the Chief Engineer. In fact the entire question of continuance of the several Sub Divisions sanctioned under the Irwin Canal and what portion of which has to be made permanent, I think, should be taken as one problem and disposed of. In this connection whether any retrenchment cannot be secured by shifting the head-quarters of the Superintending Engineer to Mandya has also to be considered. Unless details of the work to be done in these Divisions are furnished, I do not think there is any case made out for the continuance on a permanent basis of this division which was created mainly for construction work. Further there appears to be considerable scope for retrenchment in the proposed scale and unless details of the lengths of channels etc., to be maintained and maintenance costs, etc., are available, it will not be possible to fix the scale.

(A)

14. Re: continuance of the existing Divisions, the Chief Engineer should have applied for the continuance of this establishment well in time, so that orders of Government might have been obtained before the closing of the year. As this has not been done, sanction to the continuance of the establishment temporarily may be accorded for a period of 3 months and in the meanwhile, necessary details may be obtained by the Chief Engineer and the matter gone into.

from the Chief Engineer for Irrigation

forwarding comprehensive proposals

for the re-organisation of the Irrigation

Circle of Superintendence.

39. Submitted with reference to paras

13 and 14 of the notes.

40. At present the Irrigation circle

has no control jurisdiction over some

of the old river channels in the Cauvery

valley coming under the purview of

the 1924 agreement. Four channels

are under the Shimoga Circle and four

Channels are under the Mysore Circle

of Superintendence. It is stated that

the area developed under the channels

in the jurisdiction of the Irrigation Circle

is 75% of the permissible extent

SH C Flag 2

Re-organisation of Irrigation Circle of Superintendence

Serial No.

While in Shimoga circle the area developed is only 4% and in Mysore Circle it is minus. In view of this and to adopt a uniform policy it is proposed to transfer the control of the river channels taking off from the scheduled rivers viz the Cauvery, the Hemavathi, the Lakshmanathirtha, the Kabbini and the Suvarnavati to the charge of the Irrigation Circle and to revive the old Upper Channels Division with head quarters at Krishnarajanagar.

41. There are at present two Irwin Canal Divisions at Mandya viz the Irwin Canal Div and the Irwin Canal Construction Div, the former being permanent and the latter temporary. The jurisdiction of both the Divisions is stated to be almost equal in the extent of irrigation and the length of Channels. The proposal is to re-distribute the work between the two divisions and make them permanent as Irwin Canal North and Irwin Canal South Divisions with head Quarters at Mandya and Malavalli respectively.

42. In the Irrigation Circle office, a personal Asst. Assistant of the rank and status of an Asst Exr and

NOTE—Contn. Sheet.

Re-organisation of the Irrigation Circle of Superintendence.

File No. of 194 | General and Revenue Secretariat

Serial No.

Clerk on Rs 70-5-95 are proposed as an addition, as in the case of the other two Circles.

43. Temporary establishments sanctioned from time to time are proposed to be dispensed with, retaining only the minimum establishment required. A proposition statement showing the re-organisation scheme and the distribution of establishments among the several divisions and sub divisions is put up. Flag X

44. It is stated that Tuticorin is a central place and the head quarters of the Irrigation Circle should be Tuticorin only. With the re-distribution of charges and work, the allocation of charges drawing under XXV Cls is also proposed to be apportioned equally between "XXV K.R.Nagar" and "23 Irrigation"

45. Sanction is also required for the continuance of the Kattivi Reservoir Project Sub Dn till the end of June 1946. This proposal has already been sanctioned separately - vide G.O.P.W. 4984-35/E1-41-45-6 dated 16-1-1946. Flag D

the continuation of the temp. staff
of obtaining sanction for ~~casual staff~~ required
now of them for small fresh work will also
disappear. Heavy work for a few engaged on
fresh work and light work for some of the
executive staff will be avoided. The
proposals now made may therefore be appd.

Secy) 28/1/46

49. With to (A) in para 13, proposal for the
G.C.R.I has given a comprehensive reorganisn
of the whole K.R.S. Irrign jurisdiction of Circle upstream & downstream
of the dam. The proposals put up are as
as per details in the para supra at (B). The
proposals are for a perm settlt of personnel
& the avoidance of temp personnel every year.
A proposition statement is also put up, which
perhaps may have to be verified by the Comptr.
The proposals appear to be sound and are said
to result in a saving of Rs 30,000.

FINANCIAL U.O.No. II 4709 30-1-46 BANGALORE

51. I have gone through the proposals of the Chief Engineer for Irrigation in detail and I am agreeable generally to the proposals except that I consider that the number of Sub-overseers is capable of reduction.

52. The Superintending Engineer has given in his detailed note, the mileage allocated to the Sub-overseers and it is seen that while the mileage is 20 and even 25 in some cases, in other cases, especially in the Irwin Canal area where 1/3rd of the Atchkat will be dry, it is as low as 13. I think the area and the

Re-organisation of the Irrigation Circle of Superintendence

Serial No.

7K. 4709

the mileage is capable of being increased with a corresponding reduction in the total number of sub-overseers.

53. With regard to the Superintending Engineer's Office, if a Personal Assistant is to be given, a Surveyor appears to be unnecessary. One of the two posts may be reduced. (B)

54. The extra clerk also asked for may be reduced.

55. Again, generally for a Division, instead of 7 clerks asked for, the number may be reduced to six.

56. One Surveyor is proposed for each Division, but as there are Assistant Engineers and Surveyors attached to the Sub Division, a separate surveyor for the Executive Engineer's Office does not appear to be necessary. (C)

57. I have no objection to the proposals subject to the modifications suggested above being considered.

58. Ask C.E.'s views rg. (A), (B) & (C) — B — 26.2

Subject: Reorganisation of the Irrigation Circle of Superintendence.

The Chief Engineer has submitted the following proposals for the reorganisation of the Irrigation Circle of Superintendence:-

(1) Formation of a new permanent division at Krishnaraj Nagar for looking after the upper channels;

(2) Retention of the Irwin Canal Construction Division at Mandya on a permanent basis and to fix the headquarters of the two Divisions (Irwin Canal Division and Irwin Canal Construction Division now at Mandya) one at Mandya and the other at Malvalli;

(3) Creation of the post of a Personal Assistant (Assistant Engineer's rank) to the Superintending Engineer, Irrigation Circle, with a senior clerk on Rs.70-5-95 to the Circle Office in addition to the existing establishment;

(4) Redistribution of the establishment as shown in the proposition statement according to which there will be a saving of Rs.30,000 in the establishment charges; a n d

(5) Transfer of all channels and tanks in the basins of the schedule rivers contemplated in the 1924 Agreement to the charge of the Irrigation Circle.

The Financial Secretary is agreeable to the proposals in general but has suggested reduction of a few hands in the executive and clerical establishments.

P.T.O.

The Chief Engineer considers that no reduction is possible except that the two Graduate Surveyors, one in the Superintending Engineer's Office and the other in the Executive Engineer's Office, Krishnaraj Sagar Division, may be deleted for the present.

The proposals as now modified by the Chief Engineer have been approved by the Minister for Public Works and the Dewan. The concurrence of the other Ministers is required to the above proposals before obtaining sanction of His Highness thereto.

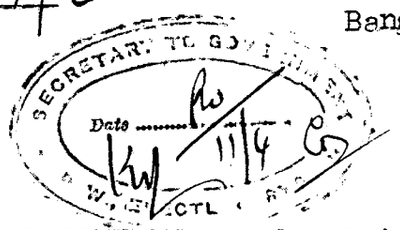
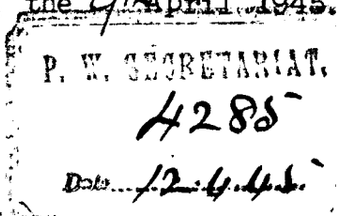
MYSORE PUBLIC WORKS DEPARTMENT,
Central Office, Irrigation,
Bangalore, Dated, the 9th April 1945.





From

M.NARASIMHAIYA, ESQ., B.A., C.E., M.I.E.,
Chief Engineer for Irrigation in Mysore,
BANGALORE.

To

The Secretary to Government,
Public Works Department,
Bangalore.

Continuance of the Irwin Canal Construction Division, Mandya, during 1945 - 1946.

Sir,

I have the honour to state that the period of sanction accorded in G.O.No.P.W.8873-81 dated 26th June 1944 for the continuance of the Irwin Canal Construction Division, Mandya, expires at the end of 30th June 1945. The Superintending Engineer, - Irrigation Circle, has requested sanction of Government being - communicated -

(a) for the continuance of the Irwin Canal Construction Division with two Sub Divisions at Mandya, and Talagavadi, respectively, with establishment as detailed in the proposition statement forwarded with this office No.13439 dated 8-12-1943 on a permanent basis from 1st July 1945, and

(b) to the continuance of the Sub Division at Gamanahally, with the establishment detailed in the proposition statement referred to above under the Column 'Temporary' and the Medical, Police and Educational Establishments during 1945-46, on account of the following reasons:-

All the capital works on the several branches of the Irwin Canal, viz., the Shimsha, Hebbakavadi, Nidaghatta and Turuganur Branches, are almost completed except for certain balance of works which are expected to be completed by the end of June 1945. The extension of Thuruganur Branch which has been sanctioned at an estimated cost of 3.65 lakhs is under execution. Other projects such as, the extension of Shimsha Branch, extension of Irrigation by opening pickup channels for making up the area lost by the creation of dry belt around villages are under investigation. Other works such as, Anti-malaria Engineering works and the opening out of Inter Village Roads are also under execution. In view of the fact that, that the capital works for which the Irwin Canal Construction Division was formed are almost completed and the work of the maintenance of the several channels and distributaries so far opened out and the large extent of Irrigation thereunder devolves on the staff of the Division, the Superintending Engineer, has recommended that the Division, with two Sub Divisions ~~are~~ one at Mandya and the other at Talagavadi be made permanent and the Sub Division at Gamanahally being continued until the Anti-malaria Engineering works and the road works are completed, as per details furnished in the proposition statement forwarded in this office No. 13439 Dated 8-12-43.

3. In this connection kind reference is invited to this office letter No.13439 dated 8th December 1943 requesting for continuing the Irwin Canal Construction Division on a permanent basis. But orders of Government were received for continuing the Division, year by year.

4. I agree with the recommendation of the Superintending Engineer, Irrigation Circle, and request that pending final orders on the proposals for making the Division permanent for maintenance works, sanction of Government may kindly be communicated for continuing the Irwin Canal - - Construction Division, with the existing establishment during the year 1945-46 in view of the several reasons - mentioned above.

I have the honour to be
Sir,
Your most obedient servant,

CHIEF ENGINEER FOR IRRIGATION.

Re Continuance of the Irwin Canal Construction Division on a permanent basis.

Sir,

With reference to your letter No.P.W.5979 dated the 23rd April 1945, on the above subject, I have the honour to forward herewith, theproposition statement received from the Superintending Engineer, Irrigation Circle, for favour of information of Government.

2. The nece sity for the conversion of the temporary - Division into a permanent one for looking after the maintenance of the several channels and the Irrigation thereunder by a - suitable redistribution of the areas between the two Divisions Viz., Irwin Canal and Irwin Canal Construction Division has been explained in detail in this office letter No.3927 dated 4th April 1943 of the Superintending Engineer, Irrigation - - Circle, forwarded with this office letter No.13439 dated 8th December 1943.

3. In t.e circumstances explained in letter No.3927 dated 4-10-1943 of the Superintending Engineer, Irrigation Circle, I request that sanction of Government may kindly be obtained for the continuance of the Irwin Canal Construction Division, with two Sub Divisions with head quarters in Mandya and Talagavadi, respectively, being continued on a permanent basis with the - establishment as detailed in the proposition statement enclosed from 1st July 1945 and to the continuance of the remaining one Sub Division on a temporary basis during the year 1945-46 for execution of the balance works.

4. Since the existing sanction for the continuance of the Division expires at the end of the current month, I request that orders of Government may kindly by communicated. Pending communication of sanction, the Comptroller may kindly be - - addressed to pass the establishment bills.

I have the honour to be
Sir,
Your most obedient servant,

M Narasimh

divisions and
of the several sub divisions sanctioned
under the Irwin Canal Scheme and what portion
of them has to be made permanent
should be taken up as one problem and
disposed of. In this connection whether any
retrenchment cannot be secured by
shifting the Head Quarters of the Supg
Engineer, Irrigation Circle, to Mandya has
also to be considered. Unless details of
work to be done in these divisions are
furnished, Govt think that there is no case
made out for the continuance, ~~of the~~
~~division~~, on a permanent basis, of
the division which was created mainly
for Construction work. For the, there appears
to be considerable scope for retrenchment
in the proposed scale and unless details
of lengths of channels etc. and other relevant particulars are furnished
Govt will not be in a position possible to fix the scale of Establt.

I am therefore to request that the
whole question may kindly be examined in the
light of the above observations made by Govt and
Comprehensive proposals forwarded for orders of Govt
by the end of the current month.

I have

Continuance of the Irwin Canal Construction Division, Mandya on a permanent basis.

P. W. 3202 18-1-46.

Sir,

Adverting to correspondence ending with your Memo No. P.W. 3653/Est. 29-45-5 dated the 13th November 1945, forwarding copy of letter to the Comptroller of Mysore, on the above-subject, and requesting forwardal of proposals for redistribution of jurisdiction etc., among the several Divisions under the Irwin Canal Scheme, I have the honour to enclose herewith a detail Note explaining comprehensively and exhaustively all aspects of the proposals and to state as follows:-

2. As at present constituted, the Irrigation Circle of Superintendence has no jurisdiction over some of the old river channels in the Cauvery Valley coming under the purview of the Mysore Madras Cauvery Agreement of 1924 with Madras Government. With a view to adopting a uniform policy and control in respect of these river channels taking off from the schedule rivers viz., the Cauvery, the Hemavathi, the Lakshmanathirtha, the Kabbini, and the Suvarnavathi, it is very necessary that the control of the channels now in charge of the Mysore and Shimoga Circles of Superintendence, is taken over to the Irrigation Circle alone. This transfer of charge will greatly facilitate advancement of irrigation policy in all the old anicut channels, coming as they do under one Administrative control. Paras 3 & 4 of the enclosed Note clearly explain the proposals and the necessity thereof.

3. With the proposal to transfer the control of the Anicut channels above the Krishnaraj Sagar, to the Irrigation Circle, the jurisdiction for the existing Krishnaraj Sagar Division

Krishnaraj Sagar Division becomes extensive, and it will not be possible to attend to the irrigation system satisfactorily. It is therefore proposed to revive the Upper Channels Division with Head quarters at Krishnarajanagar, having all the present channels and the upper channels proposed to be transferred from Mysore and Shimoga Circles. The ryots of Krishnarajanagar have been persistently petitioning to Government to revive the old Division and I fully support this proposition recommended by the Superintending Engineer, Irrigation Circle, in view of the urgent necessity for the same. This aspect is dealt with in para 6 of the Note.

4. Coming to the "Irwin Canal Scheme" proper, it has to be stated that the Irwin Canal Division at Mandya was made permanent in the year 1936 for the maintenance of the developed area of 52,400 acres under the several branches in the Division, while the Irwin Canal Construction Division was sanctioned in the year 1938 for construction works and sanction is being renewed each year. As and when the new channels became ready for service, the ryots' eagerness to develop the area intensified, so much so that the Irwin Canal Construction Division is now functioning as a maintenance Division since 1941, in addition to execution of capital works. Practically the same extent and the same length of channels are being attended to by the two Divisions, one - permanent and the other temporary.

5. The method of irrigation under the Irwin Canal is "Triennial Rotation" with continuous and intermittent supply for paddy, & semi-dry and Sugar cane. The regulation of supply to the crops has to be done almost scientifically as otherwise, there would be complaints from holders of tail end lands. Irrigation under the Irwin Canal has created fresh problems as well, such as Inter-village Communications for the transport of produce, Anti-malaria Engineering Works for preserving the health of the villages etc. These problems in addition to the regulation of water supply characteristic to the tract, are found to be too much to be -

P.T.O

to be tackled successfully unless the irrigation Divisions are suitably reinforced and the jurisdiction properly distributed.

6. It would be quite appropriate in this connection, to recall the suggestion, of Sir.M.Visvesvaraya in his Note on the Development of Irrigation under the Krishnaraj Sagar. He has stated as follows:- "After the Dam and Canal Works are completed, the Superintending Engineer's Circle as well as the three Executive Divisions will have to be permanently - maintained" etc. Now that all the capitalworks are almost over, excepting for works necessary for development of - Irrigation by improvement of duty, it is very necessary that the Irwin Canal Construction Division which is functioning already as a Maintenance Division since 1941, is made permanent, with the redistribution of work between the two Divisions as detailed in the Note.

7. The Agreement of 1924, with the Government of Madras entitles Mysore to further develop irrigation in the Cauvery Valley under certain conditions. No schemes coming under the above category have so far been developed. These are rights to be secured by the year 1974 and it is imperative that we lose no time to establish our rights in this direction. If the several projects in the Cauvery and Kabbini Valleys are not developed and the full extent of irrigable area is not brought under irrigation, it will be difficult for Mysore to retain these rights when the question comes for review. The area that has still to be developed and to be irrigated is 1,10,000 acres in addition tothe area under Krishnaraj Sagar under several other projects in the Cauvery Valley. Further, there is the question of the sharing of surplus waters after the development of the stipulated extents in Mysore and Madras in the Cauvery Valley. The behaviour of the Krishnaraj Sagar in the last two years has shown the imperative need to tackle these problems with greater vigour and to arrive at a settlement

at a settlement towards a satisfactory working of the Reservoir and the regulation of issues from it.

8. It has to be mentioned therefore, that the Irrigation Circle has very heavy responsibility both in matters arising out of the system of irrigation old and new and out of an Agreement with another Government and as such, the strength of the Circle Office technical and Ministerial, will have to be suitably increased to cope up with the increased responsibilities. The Superintending Engineer is an Administrative Officer and will have extensive jurisdiction, specially after the redistribution of work and I am of opinion that Mysore would be the only tangible Head Quarters for the Circle Office. In this connection, another important point to be impressed is that both the Mysore and Shimoga Circles have very heavy work and it is high time that sufficient strength of establishment is given to those Circles and the extra work considered heavy be attached to the Irrigation Circle.

9. The accompanying plan and Chart clearly show the several channels proposed under the control of each Division and Sub Division with head quarters for each. The staff proposed in the statement is based on experience gained and is the minimum required. Even with increased jurisdiction, there is a saving of Rs. 30,000/- per annum in the Establishment charges. The work for the staff is stiff in the unhealthy conditions.

10. I strongly recommend the following proposals to Government and request very early orders thereon:-

(1) To transfer all the channels and tanks in the basins of the schedule rivers under the 1924 Agreement now in charge of the Mysore and Shimoga Circles, to the Irrigation Circle.

(2) to re-organise the Irrigation Circle as detailed in the proposition statement,

(3) to allocate the charges under "XXV K. R. Sagar" and "23 Irrigation" as per proportions indicated,

(4) to continue the Irwin Canal Construction and the project Sub Division, Mysore, and Mandya for the Kabbini and other Reservoir Surveys till end of June 1946.

P. T. O

11. Pending final orders on the re-organisation, proposals now put up, I request that the Comptroller of Mysore, Bangalore, may kindly be authorised to pass the Establishment & Salary Bills of the Irwin Canal Construction Division, Mandya, and Special Project Sub Division, Mysore, till the end of the official year 1946.

I have the honour to be,

Sir,

Your most obedient servant,

GCS/8th.

CHIEF ENGINEER FOR IRRIGATION.

Enclosures to this office No. dated 11-12-1945, regarding the re-organisation of Irrigation Circle.

Details.

1. Note explaining the necessity for the re-organisation of Irrigation Circle Offi with the Divisions in it.

2. Statement 'A' showing existing jurisdiction of Irrigation Circle with the Divisions attached to it.

3. Statement "A" showing the river and tank channels under Irrigation Circle at present.

4. Statement "B" showing Irwin Canal and its branches opened for irrigation and showing the area under the control of each of the two Divisions Irwin Canal and Irwin Canal Constructions.

5. Statement 'C' showing the extent secured by the improvement of duty under all the river channels.

6. Statement 'D' showing the channels and area of basins of scheduled rivers, in the juriddiction of Mysore and Shimoga Circles.

7. Statement 'E' showing Irwin Canal, schedule river channels under the control of the proposed extended Circle.

8. Statement 'F' showing the allocation of charges between 25 K.R. Sagar and 23 Irrigation.

9. Statement 'G' showing the outlay on Krishnarajasagar Dam works.

10. Establishment. Note on the establishment of the proposed irrigation
10,11,12,13 & 14. Circle.

11. Noteto determine the unit of area that can be managed by a subordinate (page from 1 to 3) with two enclosures statement 1 showing the limit of area under the channels at present, statement No.2 showing the proposed distribution amongst the staff and the area etc.

12. Abstract statement showing the abstract strength of establishment as existing and as proposed.

13. Statement showing the cost of establishment as existing and as proposed.

14. Proposition statement in duplicate.

15. Plans showing the jurisdiction of Division, Head quarters, in duplicate.

16. Chart showing the length and the area under it in duplicate.

Enclosure 1.

Note explaining the necessity for the reorganisation of the Irrigation Circle with the Divisions in it.

---

1. EXISTING JURISDICTION:- Statement A and A, gives the details of the jurisdcition of each division (permanent and temporary) with the several temporary sub Divisions. These temporary Divisions and Sub Divisions were first sanctioned in the year 1939 and sanction is being renewed each year though it is being repeatedly brought to the notice since 1941 that these temporary Divisions are to be made permanent. This suspense does not conduce to efficiency and dislocates the works and organisation. These temporary divisions had a life of six years which indicates clearly that the works need this esta-blishment permanently. They have become 'Domiciled' as it were and should be treated as permanent institutions. It is not financially correct also to allocate charges of these maintenance establishments to Capital Account (38 K..R.S.)

2. TWO PERMANENT MAINTENANCE DIVISIONS ARE NECESSARY FOR THE IRWIN CANAL AREA:- The Irwin Canal Construction Division (Temporary) was sanctioned in 1938 as a temporary Division to open out new channels to bring under irrigation additional extent of 60,000 acres, while the Irwin Canal Division was made permanent in the year 1936 for the maintenance of the developed area of 52,400 acres (Vide. G.O.No. 783-92 KSS 2382-92 dated 12th November 1938 sanctioning the Irwin Canal Construction Division). This temporary Division was sanctioned in 1938 for the construction works and sanction is being renewed each year under "38 Krishnarajsagar." As the raiyats in the area of the new extensions of the channels were eager to develop the area under these extensions, water was allowed in the new channels so excavated. Irwin Canal Construction Division is in charge of this new area and is functioning as a maintenance Division since 1941 in addition to the execution of capital works. Statement B shows the length of channels under each of the temporary Construction Division and the

the permanent Irwin Canal maintenance Division, the area irrigable in the lengths and the area developed. This shows that both the Cpnstruction and the permanent Divisions are functioning since 1941 as maintenance Divisions for practically the equal extent of 40000 acres and equal length of 300 miles of channels. The method of irrigation in the Old River Channels in the Cauvery valley is ~~xixkix~~ "Flow Irrigation" by continuous supply of water in the monsoon months only. The method of irrigation under the Irwin Canal is for a Trienniel Rotational water supply with continuous and intermittent supply for paddy, semidry and sugar cane. It is found by experience that with the present staff both the Divisions are finding it extremely difficult to regulate the supply to the different standing crops. Further the irrigation on a large scale has created problems peculiar to the Irwin Canal tract. Communication for the transport of the produce to the Sugar Company and to the marketting places is one. Another serious problem is the Health of the villages and the anti-malaria Engineering - works necessitated to preserve the health of the villages. Statement B also gives the length of roads under the charge of each Division. These problems in addition to the regulation of water supply characteristic to the Irwin Canal are found to be too much to be tackled successfully for the - existing staff of the two Divisions. Sir M. Visveswaraya, in his note on the suggestions for the development of irrigation under the Krishnaraj Sagar has stated that two divisions for the Irwin Canal are to be permanently maintained (Vide. page 22 of the printed report - Jan. 1919). Hence the Irwin Canal Construction Division which is functioning as a maintenance Division since 1941-42 has to be made another permanent maintenance Division. The work will be redistributed between the two Divisions and the Divisions may be called Irwin Canal North and Irwin Canal South Divisions with Headquarters at Mandya and Malavalli respectively.

3. <u>CANALS COMING UNDER THE AGREEMENT OF 1924</u>.- (Annexure I

Annexure I V para 15 page 7 of the printed report of Final - Agreement). As per this Clause, Mysore Government is permitted to extend the area by one-third by improvement of Duty in Old Canals taking off from the rivers (i) Hemavathy (ii) Lakshmanthirtha and (iii) Cauvery. Statement C shows these old channels the area under them in 1910, the area permissible as per the 1924 Agreement and the area developed. It is seen from this statement that all the channels are not in the control of this Circle. Four channels are under the Shimoga Circle and four channels are under the Mysore Circle of superintendence. The figures of development against the permissible extent are very significant viz., that under the channels in the jurisdiction of the Irrigation Circle the area developed is 75% of the permissible extent, while in Shimoga Circle this area is 4% and in Mysore - Circle it is minus. . This incidentally underlines the fact that no quick development of irrigation is possible if these are - saddled to the routine P.W. Divisions. It is proper, convenient and necessary to take over immediately these channels from the two Circles to adopt a uniform policy in regard to the development of irrigation and to accelerate the progress, and to have the entire permitted area developed within the period specified in the Agreement. The total length of channels to be thus transferred from these Circles with the area under each channel is noted in Statement D. The length will be 286 miles irrigating 24,900 acres.

4. MYSORE GOVERNMENT is permitted under Clause 10 (iv) & (vii) of the 1924 Agreement to develop 1,10,000 acres of new irrigation under the Cauvery and its tributaries - the Scheduled ones viz., (i) Cauvery (ii) Hemavathy (iii) Lakshmanatirtha (iv) Kabbini and (v) Suvarnavathy, by means of reservoirs only. Suvarnavathy and Kabbini basins are not developed and are first to be examined. For investigation, it is necessary to know all the available details regarding the run-off, catchment, the minor and Major tanks in this area and the capacities &c. This area is in the jurisdiction of the Mysore Division, Mysore Circle. It is very necessary and proper to have the control of the tanks and channels in these

these two basins in the jurisdiction of this Circle. Immediate action has to be taken, lest we may lose this right. Statement D II shows the channels now in Mysore Division in these basins. - The length of Nugu and Suvarnavathy channels will be 115 miles, with an atchkat of 9200 acres. Statement D III shows the number of Major and Minor tanks in the Mysore Division and the four major tanks with the length of channels and the area under each.

5. To ensure a Uniform policy with regard to irrigation and thus accelerate the development permitted under Clause 10 (iv) and annexure I (v) of Mysore Madras Agreement, the irrigation Circle - should have the control of all the channels and tanks in the basins of the Scheduled rivers. The statement E shows the length of the Irwin Canal, the several river Channels and tanks and tank channels that will be under the control of the enlarged Irrigation Circle. The - total length of channels etc., will be 2000 miles irrigating an extent of 2,88,700 acres. This needs readjustment and strengthening of the staff suitable for the efficient management.

6. SHARING OF SURPLUS WATER UNDER THE CLAUSES XIV AND V:- The ~~This~~ - sharing of surplus water has to be taken up immediately. The behaviour of Krishnarajsagar these two years has shown that the impounding limit is too high and the proportionate factor too - needs modification with reference to the surplus. Secondly, it is also necessary to see that the Madras Government does not - extend the area beyond 3,01,000 acres as per Clause V of the Agreement. This engages the serious attention of one Officer. This has to ~~be~~ devolve necessarily on the Executive Engineer, Krishnaraj Sagar Division, who is the Controlling Officer.

Krishnaraj Sagar Division as constituted with the Upper channels under its charge cannot attend to the several outstanding questions arising out of the 1924 Agreement as noted above for securing the rights of Mysore. Further, when the Krishnaraj Sagar Division was made permanent in 1939, there were no problems of protective works. In 1942, the Krishnagajsagar Working Committee after detail examination of the waste weirs, proposed protective works to the extent of Rs 25 lakhs to be carried out in stages of Rs 2 lakhs a year programme at

programme to be drawn up each year after watching the effects of floods on the work done and in the area. This needed one separate Division as opined by the Committee. But it is tagged on to the present Krishnaraj Sagar Division with a temporary Sub Division for these works. As programmed, it is a continuous work for over fifteen years.

The regulation and the Waste Weir works necessitate the constant attention of the Executive Engineer at the Headquarters. Besides, the maintenance of Dam and Regulation and the Waste weir works, he has jurisdiction of the Upper Channels also. The work at Headquarters itself is so heavy that the Executive Engineer cannot efficiently manage works and channels outside Krishnarajsagar. The ryots of Krishnaraj Nagar have been persistently petitioning to Government to revive the Old Upper Channels Division with headquarters at Krishnaraj Nagar having all the present channels and the upper channels proposed to be transferred from Mysore and Shimoga Circles. The Executive Engineer, Krishnarajsagar Division will still have enough work. The statement of outlay in Krishnaraj Sagar Division exclusive of the works in Upper channels whows a recurring grant of Rs 5.5 lakhs and with other works it will be Rs 6 lakhs. This justifies the separate Division at Krishnaraj Sagar for Krishnaraj Sagar Dam and Waste Weir works. The establishment charges will also be within 10% of the percentage admitted. As stated already, besides the works proper, he has to study the problems arising out of the 1924 Agreement and other capital work incidental to Brindavan and the Hotel Krishnarajsagar. Hence, it is very necessary to revive the Upper Channels Division with Headquarters at Krishnarajnagar as before, with jurisdiction over all the river channels including those now in charge of Mysore and Hassan Divisions. The Executive Engineer, Krishnaraj Sagar Division will have the Regulation, and waste weir works and other Capital works at Krishnarajsagar. As he will have a limited area, it is proposed to grant Permanent Monthly Travelling Allowance to the Engineer, Krishnaraj Sagar Division.

7. With the increased area (as noted in para 5) and length and problems of development of irrigation, it is proposed to have four permanent maintenance Divisions for the Irwin Canal and the river channels Upper and Lower and one Division at - Krishnarajsagar for the maintenance of Dam, regulation, Protective works, maintenance of Brindavan and Hotel, besides the - Capital works incidental to the Locality. The two plans and Charts show the area and the several channels proposed under the control of each Division and Sub Division with headquarters at the places noted.

8. The Staff is proposed is as noted in the annexed Proposition Statement and is based on the experience gained. Exhaustive details for the reasons for the provision has been furnished in the detailed note appended. With the increased jurisdiction, there is a saving of Rs 30,000/- (Rupees thirty thousand) per annum. - The perusal of the details convinces that with the minimum strength the maximum efficiency is proposed to be secured.

9. TEMPORARY ESTABLISHMENT:- It is proposed to abolish all the - temporary staff sanctioned from time to time, retaining only the - staff required for (i) temporary Sub Division for the development of irrigation of 1,10,000.0 acres (ii) antimalarial Sub Divisions sanctioned recently for the Irwin Canal tract with reduced strength (iii) staff for antimalaria Engineering works in the Upper and Lower Channels Divisions (iv) staff (executive) for the protective works to the Waste Weirs of Krishnarajsagar Dam, with reduced strength. The period for which these temporary Sub Divisions and staff are required is separately discussed.

10. Even after the redistribution, each Division has an area of 70,000 acres against the 50,000 to 55,000 limit for efficient management. The work for the staff is stiff, in the unhealthy conditions of the irrigated tract. To see that the rill of water is on the - cultivators fields, to undertake antimalaria engineering works of great magnitude, to construct roads and maintain them for the transport of sugar cane and other food crops, to attend to the draining of the marshy lands and the prevention of salt efflorescence

and lastly to intercept the waste water by pick up weirs and to use them for further areas by pick up channels to get the maximum duty - are the daily intricate problems for the irrigation staff and are not comparable at all with the routine problems of Civil and road works staff. The establishment as per Proposition statement may be sanctioned. There is a permanent decrease in the Executive Establishment and there is a savings of Rs 30,000/- per annum.

Superintending Engineer,
Irrigation Circle, K.R.S. works.

KPG.

Encl 2.

Statement A.

EXISTING JURISDICTION OF THE IRRIGATION CIRCLE WITH THE DIVISIONS ATTACHED TO IT.

PERMANENT.

1. Krishnarajsagar Division. (G.O.No.P.W.518-24 dated 5th September 1939.)	Head Quarters at Krishnarajsagar with two maintenance and Regulation Sub Divisions at Krishnarajsagar and one Sub Division for the Upper Channels below the Chamaraj anicut with head quarters at Krishnaraj - nagar. Temporary Sub Divisions noted below.
2. Irwin Canal Division, Mandya, (G.O.No.1214-17/ dated 20-3-36).	with head quarters at Mandya with two Sub Divisions one at Mandya and the other at Maddur for the maintenance of the area developed under the Irwin Canal up to 1938 and with temporary Sub Divisions as noted hereunder.
3. Lower Channels Division. (G.O.No.285-86/E dated 16-7-1919).	with head quarters at Mysore with two Sub Divisions one at Frenchrocks and the other at Mysore for the maintenance of all the Lower Cauvery channels and Kabbini channels with temporary Sub Division for surveys for development of irrigation for an additional area of 1,10,000 acres and temporary section for extension of channels works.

TEMPORARY.

1. (a) Irwin Canal Construction Dn. (G.O.No.P.W.1483/KSS 3958 dated 6th April 1939).	With Head quqrtes at Mandya, started as a Construction Division for opening out the channels and branches for developing the total area of 90,000 acres and now in charge of the area so far developed with Sub Divisions one at Mandya, the other at Gamanahalli and the third at Thalagavadi and one more temporarySub Division for antimalaria engineering works.
(b) Antimalarial Sub Division.	Sanctioned in G.O.No.1040-45/ dated 24-8-1945.
2. (Krishnarajsagar Division). (a) Waste weir Sub Division.	Sanctioned in G.O.No.7146-47 dated 31-3-43 As per programme, this Sub Division has to continue for another ~~ten~~ fifteen years.
(b) Mandagere Sub Division.	Sanctioned in G.O.No.P.W.3005-9/S dated 22nd February 1941 for opening out the left bank channel from Mandagere anicut and the extension of Chamaraja ~~right~~ left bank channel.
(c) Irwin Canal section, R'rocks.	Sanctioned in G.O.No.518-24 dated 5-9-39 for maintenance of the I section of Irwin Canal.
3. Lower Channels Division.	
(a) Project Sub Division.	Sanctioned for Kabbini reservoir surveys in G.O.No.P.W.59 52-53 dated 18-2-1943.
(b) Section for extension of the channels C.D.S. & Ramaswamy.	Sanctioned in G.O.No.1284-87 dated 27-2-39 and G.O.No.2012-13 dated 8-9-1942.
4. Irwin Canal Division.	
(a) Project & Roads Sub Division.	Sanctioned in G.O.No.405-8 dated 29-6-38

(b) Antimalaria Sub Division. — Sanctioned in G.O.No.1040-45 dated 24-8-1945.

Note:- With the exception of the two antimalarial Sub Divisions which were sanctioned in August 1945, all the other Divisions and Sub Division were first sanctioned in 1938-39 and the sanctions are renewed year after year.

Grand Total 2014 2,88,600

Superintending Engineer,
Irrigation Circle,(K.R.S.Works).

Encl : 8

Statement F.

Allocation between 25 K.R.Sagar and 23 Irrigation Major.

1. As these works are maintained under "25 K.R.Sagar and 23 Irrigation- Major and as the area is approximately half and half the charge of Superintending Engineer , Irrigation Circle, may be debited ½ and ½.

2. Krishnarajanagar Division.

		Outlay.	
1.	The areaof the channels maintained under 25 K.R.Sagar.	23,200	1/3 of 69,000
	C.R.B. Channel, Mandagere right bank and Hemagiri channel.		
2.	-do- 23 Irrigation - Major.	45,800	
	Total.	69,000	

Hence the charges are to be allocated to "25 K.R.Sagar and 23 Irrigation. 1:2 & 1/3:2/3.

3. Krishnarajsagar Division - 25 K.R.Sagar completely.

4. Irwin Canal North Division.

1.	Area maintained by 23 Irrigation major, Shimsha right and left bank canal, Maddur tank.	7,000	1/10
2.	Area maintained under 25 K.R.Sagar.	65,000	9/10
		72,000	1:9.

5. Irwin Canal South Division.

1.	Area maintained by 23 Irrigation Sulekere tank and channel, S.D.S.Bannur tank and Ramaswamy channels etc.	27,500	4:7
2.	-do- by 25 K.R.Sagar.	45,000	
		72,500	4/11 or 7/11.

6. Lower Channels Division - 23 Irrigation.

Abstract

		Total cost.	25 K.R.S.	23 Irrgn.
1)	Superintending Engineer's Office.	2362	1181	1181

Bangalore 10.12.45

Superintending Engineer,
Irrigation Circle, (K.R.S. Works).

Statement G.

Encl: 9

Expenditure on Krishnarajasagar Dam works proper since 1940-41 to-date.

Excess use of outlay on upper channels.

year.	Capital works of Dam			Maintenance		Remarks.
	waste weir protective works.	Other than that protective works.	Total.	works	Total.	
1940-41	-	2,26,722	2,26,722	195,337	4,22,059	
1941-42.	-	2,06,724	2,06,724	1,32,613	3,39,377	
1942-43.	6,996	2,41,687	2,48,683	1,25,386	3,74,069	
1943-44.	2,56,159	1,15,620	3,71,779	1,37,790	5,09,569	
1944-45	2,67,362	77,136	3,44,498	1,76,320	5,20,818	
1945-46. (Provisional).	2,00,000	2,44,000	4,44,000	1,68,400	6,12,400	

Average 6,00,000 . It will be more.

The cost of the establishment is 5,725. Hence percentage is 9.5 of the recurring outlay.

Bramasingarao 10-12-45

Superintending Engineer,
Irrigation Circle, (K.R.S. Works).

Establishment End : 10

NOTE on the establishment proposed for the Irrigation Circle Office.

In the Proposition Statement, it is seen that there is an excess of Rs 419/- over the sanctioned strength for the Irriga -tion Circle Office. In the two Circles of Shimoga and Mysore, a Personal Assistant has been provided and this is not sanction-ed for this Circle. It is felt that the assistant is more needed for this Circle as ~~this~~ work here is very technical and statistical information are to be collected and furnishedto another Government. The responsibility is very great. It is therefore proposed to have a personal Assistant as in other - Circles.

Secondly, a first grade clerk in grade Rs 70-5-95 has been provided in other Circles while no provision is made for the clerk in this Circle. The references from another Government are received almost daily unlike in other Circles whose rela-tions are only internal. Details notes have to be prepared and forwarded to the Several Standing Committees. Hence the necessity for having a responsible man - one clerk in grade - Rs 70-5-95 as in other Circles is proposed.

Daily Gauges of Krishnaraj Sagar and Gauging Stations and regulation Phone calls are received in the Circle Office every day and an Attender is very necessary. This has been proposed. Even with these, the cost is Rs 2362 against Rs 2421/- in Mysore Circle.

Irrigation Circle has heavy responsibilities due to an Agreement with another Government and as such, superior staff is needed for this Office. This office is an administrative office and cannot replace executive staff in Divisions. Just Mysore is central and as development of Irrigation is only towards Nanjangud and Chamarajnagar, Mysore only can be the Headquarters of Irrigation circle. Bhadravathi 10.12.45

Superintending Engineer,
Irrigation Circle, K.R.S. works.

B

Encl : II

NOTE determining the limit of area per subordinate for efficient supply and the establishment for each - Division.

---

1. LOWER CHANNELS DIVISION was sanctioned in 1920 when there was howl from every quarter regarding inadequate water supply in the channels. The area under the control of this Division in 1920 and the channels are as per details noted in Statement No. I. The area was 60,000 acres. Atleast, one-third was suffering from inadequate supply and many of the lands were lying fallow. In 1945, the area of irrigation has been extended by another 10,000 acres without any additionaldischarge. This meant that the adequate supply is assured to all old area of 60,000 acres. The Division has justified its existence. It has increased the production by at least 2,00,000 pallas valued at Rs 8/- per palla and thus it has added Rs 16,00,000 to the wealth of the Country. It may be mentioned that there were no murmurs till last year, i.e., when the irrigation was about 65,000 acres. This meant that the optimum limit has been reached for a jurisdiction of a Division. Hence it can be safely taken for purposes of proposals as the minimum - strength required for the maximum efficiency.

2. From the statement No. I it is seen before the extended portion was put into service, the duty for a subordinate is 2800 acres for a base of 15 miles while for a Sectional Officer it is 14,000/- acres for a base of 80 miles to use the Irrigation Technology, while it is reduced to 2700 after extension was put into service. The duty for a subordinate in the Upper Channels Sub Division works to 2400 for a base of 18 miles and in the Irwin Canal Division, the duty for a subordinate is 1300 for a base of 10 miles. The latter low figure in the Irwin Canal is due to the new channels and new area and the system of rotation of supply peculiar to the Irwin Canal.

3. In a fully developed area under the river-fed channels, the limit may be taken as 2500 to 2800 acres for a subordinate and 2000 acres in the Irwin Canal.

EXECUTIVE STAFF IN SUB DIVISION:-

The statement II annexed shows the distribution of staff, the Sectional Officer and subordinates against each channel in each Division. Generally the strength of a Division is 30 subordinates and four Sectional Officers for a Division of 70000 acres. The abstract shows the average worked out as per distribution and is just the absolute requirement needed to the peculiar condition of supply in the channels in each Division.

EXECUTIVE STAFF IN THE DIVISION:-

A Project Section consisting of one Senior Graduate Surveyor and one suboverseer has been provided to investigate the projects for Pick up channels, the measures for the improvement of Duty such as parallel contour canals. The Irrigation Statistics especially on the Irwin Canal and drawing of programme and supply of the information as per the 1924 Agreement give enough work and continuous work for the Project Sections.

2. Mojinidar has been provided for each Irrigation Division for measurement of areas developed and encroachments and for facilitation of acquisition work. In the Irwin Canal Divisinn where there is sanction for a Mojinidar his services are found very useful.

MINISTERIAL STAFF:-

Accounts Staff: An Accountant and four Accounts clerks are provided for each Division. The distribution of work is as noted below. This should solve the chronic complaint of nondisposal of Audit Notes, nonsubmission of accounts in time and lastly and the most important, the correct accounting and check of suspense accounts - material and stock accounts for which no one takes the responsibility.-

Accountant - Manager.

One Accounts clerk for compilation of accounts, disposal of Audit Notes and Objectionable items;

One Accounts clerk - Cashier and passed bills, Establishment.

One Accounts clerk solely for Store Account, checking of firms' Bills, verification of material account and suspense account; to be made responsible for the Stock account in current instead of the Store-keeper.

The fourth Accounts clerk for Final bills checking and disposal

disposal of questions relating to Bills.

P. W. Clerks in Division:-

Five clerks are needed for the routine work of the Division as notedin the margin. Generally it is the P.W.D. clerk that CHecks the Bills under the supervision of the Accountant. To avoid all the return of Bills as per want of approval etc., it is very necessary to allocate one P.W.D.clerk for each sub Division (i) to check the Bills (ii) disposal of references referred to and (iii) the maintenance of IC' Registers which is neglected in all the Divisions and for which none is held responsible. With the distribution of work as noted above, the individual responsibility can be fixed.

Head Clerk - Head of Current Branch.
1 Clerk for Typing
1 clerk for Record Keeping.
1 Clerk for Stores.
2 Clerks for general works.
5 C o m m o n.
2 Clerks one for each Sub Division Maintenance of "C" Registers and all references connected with works in the Sub Division.

P.W. Clerks in Sub Divisions:-

Three clerks are found necessary and are provided as per sanctioned strength for each Sub Division. This strength is necessary for the initial records that are to be maintained correctly.

Peons and Lascars:-

The usual strength of peons sanctioned for a Division and sub Division is allowed. Provision has been made for Lascar for each of the Sectional Officers as per present rules, governing the appointment of Lascar. It may be noted that the Lascars pay was being charged to works 'Maintenance of Channels with the Sowdies. The cost of Establishment would be 80% of grant leaving little or nothing for works. As it is practically an establishment, the Lascar has been included in the Proposition Statement.

Drawing Section:-

In place of two Assistant Draftsman, one Asst. Draftsman and one Tracer has been proposed as the latter will be more useful.

Bonnaswigaon 10.12.45

Superintending Engineer,
Irrigation Circle, K.R.S, works.

Annx Statement No 1.

Statement showing the area and jurisdiction for each subordinate.

I Channels below reservoir when the Lower Channels Division was formed in 1920

	Length.	Area.
1. Two low level canals from K.R.Sagar		
(i) Right Bank low level canal including branches.	26¼	3200
(ii) Left Bank low level canal.	12½	1400

Signed by for Secretary

Sir,

With reference to your letter No. 1286/S dated 16-1-1946, forwarding comprehensive proposals for re-organisation of the Irrigation Circle of Superintendence, I am directed to request you kindly to furnish your views early on the following points:—

(i) ~~Right~~ the detailed note furnished by the Superintending Engineer, Irrigation Circle, in regard to the area and length

List of enclosures

Copied by

Examined by

WD 04161—GPB—60,000—24-10-41

of channels to be allotted to the several subordinates in the circle, it is seen that while the mileage is 20 and even 25 in some cases, in other cases, - especially in the Irwin Canal area where 1/3rd of the Tehsil will be dry - it is as low as 13. The area and mileage norms are capable of being increased with a corresponding reduction in the total number of Sub-overseers.

(ii) With regard to the Superintending Engr's office, a Personal Asst is proposed in addition to the existing Surveyor. In case a Per Asst is to be given, the Surveyor appears to unnecessary and therefore one of the two posts is capable of reduction.

(iii) One Surveyor has been proposed for each of division offices except the KR Lagoon Div. As there are Asst Engrs and Surveyors attached to each sub division a separate Surveyor for the division office does not appear to be necessary.

The proposal of the Department is herewith returned for re-consideration, after

G. R. S. App. F. G. 3.

GENERAL AND REVENUE SECRETARIAT.

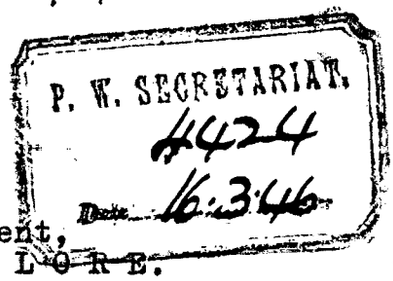
Encl 1 Statement

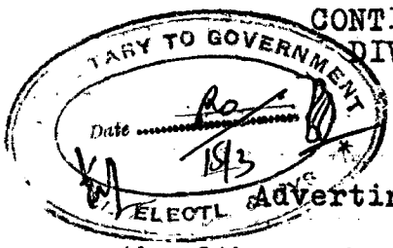
OFFICE OF THE CHIEF ENGINEER
for Irrigation in Mysore,
Bangalore, 14th March 1946.



To

The Secretary to Government,
Public Works Department,
B A N G A L O R E.

Sir,



CONTINUANCE OF THE IRWIN CANAL CONSTRUCTION DIVISION, MANDYA, ON A PERMANENT BASIS.

Adverting to your letter No.P.W.6004/Est.29-45-8 dated the 8th March 1946 on the above subject, I have the honour to state as follows.-

1. It has been suggested that the area and the mileage to be allotted to each subordinate in the Irwin Canal area are capable of being increased with corresponding reduction in establishment. The area of about 2,000 acres per subordinate with a length of 20 to 25 miles of canal has been worked out on the basis of statistics collected in the Upper and Lower Channels, where irrigation is established. The system of Irrigation is not also continuous, the irrigation season being over by the middle of January each year. Thus, the - - subordinates in charge of the channels other than the Irwin Canal have to be responsible for proper distribution of water in the period between June and January and for the annual maintenance works in the other half of the year. Hence the jurisdiction is some what enlarged.

In the case of Irwin Canal where the system of irrigation is one of continuous but intermittent supply throughout the year the regulation of water has to be almost scientific. The usual complaints of inadequacy of water in the tail end reaches through wastages in the upper portions have to be guarded against and this is to be

rendered specially effective in the Irwin Canal branches which carry water over long distances. Careful regulation of water and the conservation of water in the Irwin Canal area has to be done effectively to improve the duty and secure increased area for Irrigation. Problems other than irrigation are also to be attended to by the subordinates. All these factors therefore call for a continuous and sustained effort on the part of the subordinate who has to keep vigilant all the year round to assure increased revenue and increased production. It is apparent therefore that the jurisdiction for the subordinate in the Irwin Canal area has to be some what limited as compared to those in charge of established channels.

2 ii) The provision for a Surveyor in addition to Personal Assistant in the Circle Office is necessary, in as much as calculations and scrutiny of designs etc., in the Drawing Branch requiring higher technical training cannot be expected of the non-graduate Draftsmen.

3 iii) The services of a Surveyor for each of the Divisions except for Krishnarajsagar are necessary to assist the usual Draftsmen in the Division Office in checking the calculations, complications etc., of project and other estimates requiring higher scrutiny. Excepting for the daily regulation of issues to Madras, Gauging and Maintenance works of Dam and Grades and Hotel, the Krishnarajsagar Division may not have to deal with Projects, irrigation or otherwise. As such the provision for a Surveyor is deleted in the establishment for the Krishnaraj Sagar Division Office.

(2) The observations of Government will, however be kept in view and the full strength proposed will not be utilised unless absolutely necessary.

(3) The proposition statement is herewith resubmitted without ~~any~~ modifications for reasons stated in paras supra.

(4) The No. and date of the Government Order sanctioning the post of a Surveyor for the Circle Office is G.O.No.520-21/KSS.1706-07 dated the 10th December 1936.

I request the favour of very early communication of sanction of Government to the proposals made therein.

I have the honour to be
Sir,
Your most obedient servant,

CHIEF ENGINEER FOR IRRIGATION.

SS.14/3.

5. G.O.No.P.W.4954-55/Est. 41-45-6 dated 16th January 1946, sanctioning the continuance of the Kabbini Reservoir Project Sub Division with the additional Suboverseers till the end of June 1946.

6. Correspondence ending with letter No.6107/E dated 14th March 1946 from the Chief Engineer for Irrigation, submitting proposals for the reorganisation of the Irrigation Circle of superintendence including the Divisions comprised therein.

Order thereon No.P.W.9012-17/Est.29-45-14 Dated, Bangalore, 27-6-1946

All the capital works on the several branches of the Irwin Canal, viz., the Shimsha, Hebbakavadi, Nidaghatta and Turuganur Branch for the execution of which the Irwin Canal Construction Division has been continued at Mandya, have been completed, the only allied work remaining being (1) execution of the Shimsha Branch and opening of pick up channels to make up the area lost by the creation of dry belt around the villages, (2) opening of inter-village roads and (3) execution of anti-malaria engineering works. With a view to attend to the work of maintenance of the several channels and the vast extent of irrigation thereunder, the Chief Engineer has submitted the following proposals for the reorganisation of the Irrigation Circle of superintendence including the Divisions comprised therein:-

(1) Formation of a new permanent Division at Krishnarajnagar for looking after the upper channels;

(2) Retention of the Irwin Canal Construction Division at Mandya on a permanent basis and fixing the headquarters of the two Divisions (Irwin Canal Division and Irwin Canal Construction Division now at Mandya) one at Mandya and the other at Malvalli;

(3) Creation of the post of a Personal Assistant (Assistant Engineer's rank) to the Superintending Engineer, Irrigation Circle, with a senior clerk on Rs.70-5-95 to the Circle Office in addition to the existing establishment;

(4) Reduction of the establishment resulting in a saving of about Rs.40,000 in the establishment charges; and

(5) Transfer of all channels and tanks in the basins of the Schedule river, contemplated in the 1924 Agreement with the Government of Madras, to the charge of the Irrigation Circle.

2. After careful consideration Government are pleased to accord sanction to the above proposals of the Chief Engineer, the establishment sanctioned for the several offices comprised in the Irrigation Circle being as shown in the accompanying proposition statement.

3. The Chief Engineer is requested to see that full strength of establishment as now sanctioned is not entertained unless absolutly necessary.

4. The continuance of the Irwin Canal Construction Division with the existing officers and the entire establishment is sanctiond till the proposals sanctioned in this order are given effect to.

For Secretary to Government,

GOVERNMENT OF HIS HIGHNESS THE MAHARAJA OF MYSORE.

PUBLIC WORKS DEPARTMENT.

G. O. No. P. W. 9012-17—Est. 29-45-16, dated 27th June 1946.

Irrigation Circle of Superintendence.

Sanctions the proposals for re-organization of the —— .

READ—

Government Order No. P. W. 1214-17—3718-21, dated 20th March 1936, sanctioning the proposal to treat the Irwin Canal Division at Mandya, as permanent.

2. Government Order No. P. W. 518-24—KRS. 1202-8, dated 5th September 1939, according sanction to the permanent retention of the Krishnaraj Sagar Division.

3. Government Order No. P. W. 8458-60, dated 12th June 1944, sanctioning the permanent retention of the Irrigation Circle of Superintendence.

4. Government Order No. P. W. 1034-35—Est. 29-45-2, dated 21st August 1945, directing that the Irwin Canal Construction Division at Mandya be continued till the end of September 1945, pending examination of the proposal for its permanent retention.

5. Government Order No. P. W. 4954-55—Est. 41-45-6, dated 16th January 1946, sanctioning the continuance of the Kabbini Reservoir Project Sub-Division with the additional Sub-Overseers till the end of June 1946.

6. Correspondence ending with letter No. 6107—E., dated 14th March 1946, from the Chief Engineer for Irrigation, submitting proposals for the re-organisation of the Irrigation Circle of superintendence including the Divisions comprised therein.

ORDER No. P. W. 9012-17—EST. 29-45-16, DATED BANGALORE, THE 27TH JUNE 1946.

All the capital works on the several branches of the Irwin Canal, *viz.*, the Shimsha, Hebbakavadi, Nidaghatta and Turuganur Branches for the execution of which the Irwin Canal Construction Division has been continued at Mandya, have been completed, the only allied works remaining being (1) extension of the Shimsha Branch and opening of pick up channels to make up the area lost by the creation of dry belt around the villages, (2) opening of inter-village roads and (3) execution of anti-malaria engineering works. With a view to attend to the work of maintenance of the several channels and the vast extent of irrigation thereunder, the Chief Engineer has submitted the following proposals for the re-organisation of the Irrigation Circle of Superintendence including the Divisions comprised therein :—

(1) Formation of a new permanent Division at Krishnarajnagar for looking after the upper channels ;

(2) Retention of the Irwin Canal Construction Division at Mandya on a permanent basis and fixing the headquarters of the two Divisions (Irwin Canal Division and Irwin Canal Construction Division now at Mandya) one at Mandya and the other at Malvalli ;

(3) Creation of the post of a Personal Assistant (Assistant Engineer's rank) to the Superintending Engineer, Irrigation Circle, with a senior clerk on Rs. 70—5—95 to the Circle Office in addition to the existing establishment ;

(4) Reduction of the establishment resulting in a saving of about Rs. 40,000 in the establishment charges ; and

(5) Transfer of all channels and tanks in the basins of the Schedule rivers, contemplated in the 1924 Agreement with the Government of Madras, to the charge of the Irrigation Circle.

2. After careful consideration, Government are pleased to accord sanction to the above proposals of the Chief Engineer, the establishment sanctioned for the several offices comprised in the Irrigation Circle being as shown in the accompanying proposition statement.

No. P. W. 9012-17—EST. 29-45-16, DATED 27TH JUNE 1946.

3. The Chief Engineer is requested to see that full strength of establishment as now sanctioned is not entertained unless absolutely necessary.

4. The continuance of the Irwin Canal Construction Division with the existing officers and the entire establishment is sanctioned till the proposals sanctioned in this order are given effect to.

K. D. JOSHI,
Secretary to Government,
Public Works Department.

To—The Chief Engineer for Irrigation.
The Chief Engineer for Roads and Buildings.
The Revenue Commissioner in Mysore.
The Comptroller to Government through the Financial Secretariat.
The Director of Public Health in Mysore.
The Deputy Commissioners of Mysore, Mandya and Hassan Districts.
The Superintendent, Government Printing.

EXD.—T. N. S.

No. P. W. 9012-17—Est. 29-45-16, dated 27th June 1946.

ANNEXURE.

Statement of Proposition for Revision of Establishment in the Irrigation Circle of Superintendence including the Divisions comprised therein.
